

The Fcc should not implement any perposel that would lesson Indiana's telephone privecy law protections

Since the law has been in efect we can actuly get some pece and Quiet in our own home instead of being interuped at all houers of the day and night by unwanted calles. I chose to work nights and sleep in the afternoon and evening befor the law I would be woken every day and mosd days several times Now I can actuly get some rest.

I feel like the phone is for my convenience not for some company to sell me something. As long as I have to pay the bill I should be abel to choose who calles me. Only companies that I already do business with should be abel to call me. Unwanted sales calls should be illegal and should be stoped.

Thank you Donnie Reed
